

Vectra AI Platform Azure Metadata Attributes and Descriptions

This document describes the important attributes in all Azure metadata supported by the Vectra AI Platform.

Field	Description
actor.id	Internal Vectra UI reference ID
actor.name	Actor identity which has performed the operation
actor.objectid	Canonical ID of the actor
applicationid	The application ID used to perform the operation
applicationname	The application name used to perform the operation
calleripaddress	The caller IP address, if the operation was from a publicly accessible endpoint
category	The log category of the event
correlationid	A GUID used to group together a set of related events
durationms	The duration of the operation in milliseconds
identity	A JSON blob that describes the identity of the user or application that performed the operation
level	The severity level of the event: Informational, Warning, Error, or Critical
location	The Azure region of the resource emitting the event
objectid	The object ID of the entity which performed the operation
operationname	The name of the operation that this event represents
operationversion	The API version associated with the operation
properties	Extended properties related to the event; all custom or unique properties must be put here

Field	Description
resourcegroup	The resource group containing the resource which emitted the event
resourceid	The tenant ID associated with the event
resultdescription	The static text description of this operation
resultsignature	The substatus of the event; if this operation corresponds to a REST API call, this is the HTTP status code of the corresponding call
resulttype	The status of the event
roleid	The ID of the role used for the operation
rolename	The name of the role used for the operation
rolescope	The scope of the role used for the operation
subscription	The subscription ID of the resource which emitted the event
tenantid	The resource ID of the resource that emitted the event
time	The timestamp (UTC) of the event
timestamp	Event timestamp
vectra.identity.id	Vectra UI reference ID for identity
vectra.identity.name	Identity that performed or is targeted by the operation
vectra.identity.objectid	Canonical ID of the Vectra identity
